SUMMARY

Data Visualization Software Engineer with over 10 years of experience building real-time, data-intensive dashboards using React.js and modern frontend technologies. Strong background in designing and developing responsive dashboards for monitoring systems, operational KPIs, and live data streams, with hands-on experience using WebSockets, RESTful APIs, and high-frequency data updates. Experienced in optimizing performance for large datasets and ensuring reliability, scalability, and maintainability in production environments. Comfortable collaborating with backend, system, and cross-functional teams to align data structures, interfaces, and delivery goals.

WORK EXPERIENCE

OMD Armenia LLC

Senior Front-End Engineer

2016 – present

Project: Real-time Visual Analytics Dashboard

Coordinate development activities across technical team members, Track project tasks, deliverables, and timelines using Jira and MS Project, Prepare technical documentation, functional specifications, and reporting artifacts, Support stakeholder communication between technical team and business units, Participate in planning sessions, sprint reviews, and roadmap alignment, Maintain structured documentation for releases and system architecture

AI Integration & Process Optimization

Use AI tools (Claude AI) for structured documentation drafting, requirement clarification, technical summarization, and workflow optimization

Leverage AI-assisted analysis to improve technical specifications, generate structured reports, and enhance meeting documentation

Apply AI tools to optimize productivity, research technical solutions, and support decision-making processes

Environments: React.js, Redux, Typescript, WebSocket, Canvas, Jira, MS Project

Relq technology school

Web development trainer

2021 - 2022

- Led and mentored students in learning web development concepts, JavaScript fundamentals, and introductory React, fostering teamwork and collaboration.
- Guided students in developing web projects from basic structures to full-stack applications, including single-page applications and e-commerce platforms.
- Designed and implemented structured lesson plans, project-based learning activities, and peer-to-peer collaboration to enhance individual competencies.
- Provided coaching and technical guidance to support student growth and project execution.

Used technologies: JS, ReactJS, Auth(oAuth), SemanticUI, Html5, Css3

MicroBiz LLC

Front-End Engineer

2015 – 2016

Worked on design and development of front end solutions for Retail automation and management software

Barsamini Toort LLC

Software Engineer

2014 – 2015

Create and Develop e-commerce web sites (nodejs, mysql, angularJs, jade, scss, wordpress, js,html5/css3)

PicsArt LLC

Software Engineer

2011 – 2014

Photo Editing Application and Social Network.

- Designing, developing, and managing information technology based websites web and mobile application, Create the application's web site, develop the RESTful API

EDUCATION

MBA in International Project Management ([Barcelona Executive Business School \(BEBS\), Barcelona](#))

October 2025 – Present (1-year program)

Focus: Project Planning, Risk Management, Infrastructure & Industrial Project Frameworks, Financial & Strategic Management

Google Project Management Professional Certificate (v2)

(Issued May 20, 2025)

Delivery Management Specialization ([Epam Master's Program](#))

2023-2024

❖ Agile Thinking, Project Management, People Development, Customer Relationship Management (CRM), Delivery Management as Discipline, Delivery Complexity, Agile at scale, Value Proposition, Commercial Models

Master's Degree in Development of Information Systems

2005 -2011

(*Information Technologies and Research Center*),

[Yerevan State University, Faculty of Informatics and Applied Mathematics](#)

SKILLS

Technical Skills / technologies: [JavaScript](#), [TypeScript](#), [React](#), [Redux](#), [Canvas](#), [WebSockets](#), [Webpack](#), [Node.js](#) ([Express](#))

Project Management: [Agile methodology](#) ([Scrum](#)), [Jira](#), [Agile Thinking](#), [Project Management](#), [Project Planning](#), [Communication](#), [Time Management](#), [Problem-solving](#), [People Development](#), [Customer Relationship Management](#)

Tools: [Git](#), [JIRA](#), [Microsoft Project](#) | **Testing Environments:** [Jest](#), [Sikuli](#)

LANGUAGES: [English](#), [Russian](#), [Armenian](#)

PRACTICE

[Epam Systems](#)

2024 March - 2024 May

Delivery Manager (intern)

Project: [Agile Estimation Tool](#) for MS Teams

Supported planning and resource allocation, Coordinated SDLC processes and monitored delivery milestones, Maintained project documentation and internal reporting, Assisted in removing project impediments, Prepared project artifacts related to scope, process, and delivery tracking (Environments: [Jira](#), [Microsoft Project Tools](#))
